Partial End Of Life Announcement, TRACOPOWER ESP Series

An internal key component used for TRACOPOWER ESP Series (60-150 Watt models) power supplies has unexpectedly been made obsolete and is being withdrawn from the standard component market by its manufacturer, causing rapid device unavailability.

In consequence, TRACO is forced to declare the partial discontinuation of ESP Series (60-150 Watt models).

Factory production order entry acceptance for ESP Series (60-150 Watt models) will terminate end of December 2013.

Accordingly, customers are requested to place their Last Buy Orders to TRACO or its Distributors by December 15. 2013.

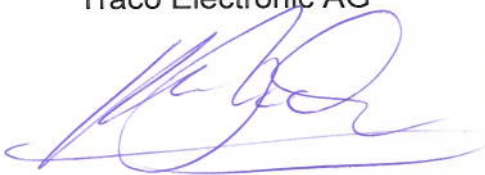

Form-fit-function TRACOPOWER substitutes unfortunately do not exist for ESP Series (60-150 Watt models).

Affected customers may perform replacement evaluations on TRACOPOWER Series TOP-60; TOP-100; TOP-200; TPP-100; TPP150; TXH; TXM, subject to full customer engineering approval.

We thank you for your understanding and apologize for any resulting inconveniences.

With best regards,

Traco Electronic AG
