

TO WHOM IT MAY CONCERN

REACH Declaration

TRACO Electronic AG (TRACO) and its legal EU Entities produce, import and globally distribute TRACOPOWER products (Power Supplies and DC/DC Converters).

TRACOPOWER products do not fall under the REACH directive, because they do not belong to, nor are containing, nor are associated with any of the following material groups:

- a) substances on their own
- b) substances in preparations
- c) substances in articles intended for release

Therefore, according to the REACH directive:

1. No suppliers of legal TRACO Entities or TRACOPOWER production plants need to be asked or surveyed for pre-registration
2. None of the legal TRACO Entities or TRACOPOWER production plants need to nominate any "only representative"
3. All legal TRACO Entities and TRACOPOWER production plants will continue to produce, import and globally distribute TRACOPOWER products without any change
4. Availability of TRACOPOWER products will not be affected by REACH compliance activities.

On demand TRACO will submit REACH declarations for individual TRACOPOWER products, based on max. 0.1% weight-per-part presence of all materials within the SVHC list active at declaration issue date. The next yearly declaration update is foreseen in January 2011.

Zürich, July 6. 2010
