

Traco Power Solutions are developing power supplies for Industrial, IT, Household, Medical, Electro-mobility and Solar Applications in Wexford and Cork (Ireland) and our manufacturing facilities are in Asia and Ireland. We want to strengthen our team and improve our project management. We offer a dynamic and challenging work environment. If you're a highly motivated individual with a passion for project management, we'd love to hear from you.

Job Title: **Quality Manager**

Location: Wexford

Reporting Structure:

The successful candidate will report to the Managing Director and work closely with the Project Manager, R&D Manager, NPI Manager, Production Manager, and the Finance & Administration Manager. He/She will be part of the company management team.

Job Summary:

We are seeking a Quality Manager to oversee our Quality Management System and ensure customer satisfaction. The candidate will be responsible for managing the customer returns, supplier quality, Design Verification Testing (DVT), Production Verification Testing (PVT), leading the Quality Assurance team, qualifying alternative components, collaborating with the design team to determine the required actions, and leading supplier visits and audits in the Far East. An ideal candidate should have a background in electronics and knowledge of IPC standards and quality management systems such as ISO 9001 and ISO 13485.

Key Responsibilities:

- Lead and manage the Quality Assurance team of 5 members.
- Manage the Quality Management System to ensure compliance with industry standards and regulations, including IPC-A-610, ISO 9001, and ISO 13485.
- Investigate and resolve customer complaints and returns to ensure customer satisfaction.
- Collaborate with suppliers to establish quality standards and manage supplier quality performance.
- Conduct DVT and PVT to ensure that products meet quality and performance requirements.
- Contribute to failure investigations and root cause analysis and lead the team in creating 8D reports.
- Qualify alternative components and collaborate with the design team to determine the required actions.
- Lead supplier visits and audits in the Far East.
- Identify areas for process improvement and implement corrective actions to improve product quality.
- Monitor and analyze quality performance data and report on trends to management.
- Develop and implement training programs to enhance the quality culture and knowledge of the Quality Assurance team.
- Manage the internal audit program to ensure compliance with industry standards and regulations.

Qualifications:

- Bachelor's degree in electrical engineering or related field.
- Minimum of 5 years of experience in quality assurance and/or management in electronic manufacturing.
- Knowledge of IPC standards, including IPC-A-610, and experience in failure analysis and root cause analysis.
- Interest in quality processes and continuous improvement.
- Six Sigma certification is a plus.

Personality:

- Strong leadership skills and ability to manage and develop a team.
- Excellent communication skills and ability to collaborate with cross-functional teams and with customers.
- Ability to work independently and prioritize multiple tasks in a fast-paced environment.
- Attention to detail.
- Logical thinking.
- Speak with data.
- San Gen Shugi attitude
- Willingness to travel internationally, including to the Far East.

Why to join Traco Power Solutions?

- Competitive salary and bonus system
- Good work-life balance with flexible working hours
- Flat and small size organization
- Empowerment of employees
- Unique opportunity to learn technical subjects in depth.
- Make tangible things with visible results quickly.
- Contribute to sustainable development through technology.
- International and multicultural environment
