The TEN 10 series is a family of high performance 10W DC/DC converters in a compact 2" x 1" low profile package with industry standard footprint. A high efficiency allows a wide operating temperature range of –40°C to +85°C. A built-in EMI filter is built in to meet EN 55022, class A without any external components.

Further standard features include over voltage protection and short-circuit protection. Typical applications for these converters are battery operated equipment, instrumentation, distributed power architectures in communication and industrial electronics, everywhere where isolated, tightly regulated voltages are required.
