AC/DC Medical Power Supply

TPP 300A-M Series, 300 Watt

- High power-density: 300 Watt in 4”x2” package (open frame)
- I/O isolation 4000 VAC rated for 250 VAC working voltage
- Certification according to IEC/EN/ES 60601-1 3rd edition for 2 x MOPP
- Risk management process according to ISO 14971 incl. risk management file
- Acceptance criteria for electronic assemblies acc. to IPC-A-610 Level 3
- Peak power operation up to 360 Watt for 5s
- Operating temperature –40°C to 85°C
- Active power factor correction >0.9
- Operating up to 5000m altitude
- 5-year product warranty

The TPP 300 series is a set of AC/DC power supplies in an open frame package style. They feature a reinforced double I/O isolation (4000 VAC) system according to latest medical safety standards. The TPP series also has a low leakage current of <100 μA which makes the units suitable for BF (body floating) applications. The excellent efficiency of up to 93% allows a high power-density and compact design (4” x 2”). The operating temperature range is –40°C to +85°C with derating above 50°C. In natural convection operation these power supplies deliver 180 Watt going up to 300 Watt with forced air cooling. Additionally, they can deliver 360 Watt peak power for 5s. The EMC characteristic is dedicated for applications in industrial and medical fields. High reliability is provided by using high quality components and an excellent thermal management making the TPP 300 an ideal solution for industrial and medical devices and for demanding safety and space critical applications.
