Industrial Power Supplies

TSP-WR Series, 180–600 Watt

- For global use with single- and two phase wide-range input 100/230–500 VAC
- Rugged metal case for harsh industrial environments
- Industrial operating temperature range: –25°C to +70°C
- Power OK signal
- Remote On/Off
- Shock and vibration-proof
- Indefinite short circuit, overvoltage and overtemperature protection
- Redundancy module
- Buffer module for power backup
- Battery controller module
- 3-year product warranty

The successful TSP series of high performance DIN-rail mount power supplies has been expanded with models featuring wide input ranges of 85-132 / 187-264 / 323-550 VAC. With these input ranges the power supplies can be used in almost all single- and multi phase power networks worldwide.

A high, continuously available power reserve guarantees reliable start-up of loads with high inrush currents. Excellent electrical specifications and high immunity against electrical disturbances make these compact power supplies the best choice to power sensitive loads in industrial process control systems, machine tools or any other demanding industrial application. The power supplies comply also with IEC/EN 61204-3, the EMC standard for Industrial environment.

3 add-on modules for extra functions offer a great flexibility in system applications. A module for redundant operation with true power sharing is available. With the battery controller module the power supplies can be extended to a perfect DC-UPS system. The buffer module provides power back-up for up to 4 seconds without the need of any batteries. Easy and vibration proof installation with pluggable screw terminal block and snap-on mounting on DIN-rails.

TSP-WR Series, 180–600 Watt

Input Specifications

Applicable 3-phase networks
- TN, TT Systems: 500 VAC Star configuration (EN60950, UL508)
  500 VAC Delta (UL508 only)
- IT Systems: 400 VAC Delta (IEC-62103)
  230 VAC Delta (IEC-60950)
  500 VAC (UL508)

Input ranges
  select (low/high) by manual switch:
  auto range selection in high ranges: 85–132 VAC / 187...550 VAC
  input frequency: 47–63 Hz

Harmonic limits
EN 61000-3-2, Class A (for limited output power)

Holdup time
20 ms min. (full load 230 – 500 VAC)

Inrush current
  TSP 180-124WR < 23 A
  TSP 360-124WR < 46 A
  TSP 600-124WR < 50 A

Efficiency
88 % typ.

Output Specifications

Output voltage adjustable range
24–28 VDC

Regulation
  - Input variation 0.5 % max.
  - Load variation (10–100 %) 0.5 % max.
  - Load variation (10–100 %) parallel mode 2.0%

Ripple and noise (20MHz bandwidth)
100 mV pk-pk typ. (150 mV pk-pk max. at Imax)

Electronic short circuit protection
  current limitation at 125 % of Imax.
  constant current, automatic recovery

Output overvoltage protection
34 V

Overload protection
electronic overload protection

Overtemperature protection
switch off at overtemperature, automatic restart

Status indicator
dual colour LED
  green: DC OK, red: DC off

Power OK signal
  - trigger threshold 18 – 22 V
  - relay output DC OK = contact closed [rated: 30 VDC/1.0 A]

Max. capacitive load
unlimited

General Specifications

Operating temperature range
-25°C to +70°C max.
  (for derating see graph A on page 3)

Cooling
convection cooling, no internal fan

Storage temperature
-25°C to +85°C

Humidity [non condensing]
95 % rel. H max.

Pollution degree
2

Temperature coefficient
0.02 %/K

Reliability, calculated MTBF at +25°C acc. to IEC 61709
>350’000 hours in accordance to IEC 61709

Remote On/Off
by ext. contact.
  DC on: -S contact open
  DC off: -S connected via 1 Kohm to -Vout

Safety standards
- Information technology equipment
  IEC/EN 60950-1, UL 60950-1
  CSA-C22.2 No. 60950-1-03,
  CSA-C22.2 No. 107.1-01
- Industrial control equipment
  UL 508
- Electrical equipment of machines
  EN 60204
- Electronic equipment for power installation
  EN 50178
- Safety transformers for SMPS
  EN 61558-2-16

Environment
– Vibration acc. IEC 60068-2-6;
– Shock acc. IEC 60068-2-27

3 axis, sine sweep, 10-55 Hz, 1g, 1oct/min
3 axis, 15 g half sine, 11 ms

Enclosure material aluminium (chassis) / zinc plated steel (cover)

Mounting
– DIN-rail mounting
– Wall mounting (option)

for DIN-rails as per EN 50022-35x15/7.5
(snap-on with self-locking spring)
with wall mounting bracket - see page 10

Connection detachable screw terminals (plugs included)
2 terminals per output

Output Power Derating

A) Output Power Derating vs Ambient Temperature

B) Output Power Derating vs Input Voltage

All specifications valid at nominal input voltage, full load and +25°C after warm-up time unless otherwise stated.

Function Modules Overview

Redundancy Module:
With this module and two power supplies of the TSP-(WR) series a highly reliable, true redundant power system can be configured without any additional components. This module provides:

- Operation with true current sharing
- Alarm outputs and redundancy OK signal
- Hot swappable inputs can be loaded up to 15 A each (resp. 25 A with model TSP REM600)

</tr>
</tbody>
</table>

Battery Controller Modules:
This module provides a professional battery controller to charge and monitor an external lead-acid battery. Together with a power supply of the TSP series and a battery pack a perfect DC-UPS system can be configured. This module provides:

- Battery protection for over voltage, deep discharge, short circuit and reverse connection
- Remote On/Off for battery and power supply
- Alarm outputs for input, output and battery condition
- Controlled end of charge voltage by temperature sensor
- Redundant inputs for two independent sources (TSP–BCMU360 only)

Buffer Module:
This module will maintain the output voltage of a 24 VDC power supply during typical mains faults, short time blackouts or voltage dips of up to ten full 50 Hz cycles. During this buffer period no deterioration of the 24 VDC output voltage will occur. This module provides:

- Capacitor bank for energy storage, no battery needed!
- Maintenance free, long lifetime, high performance also at low temperature.
- Guaranteed Hold-up-time 200 ms/25 A to 4 s/1.2 A max.
- Output 24 to 28 VDC, 600 W max.
- Active ready and inhibit signals
